Special Thanks to our host, The New York Public Library

Founded in 1895, The New York Public Library is the nation's largest public library system. Many of its 87 neighborhood branches date to Andrew Carnegie's philanthropic efforts at the turn of the 20th century, and continue to provide vital information services to communities throughout Manhattan, the Bronx, and Staten Island. The iconic 42nd Street library and 3 other research centers hold renowned research and historical collections. Altogether, the library locations hold more than 51 million items and serve more than 18 million patrons a year—and millions more online. Find out more about NYPL at www.nypl.org.

New York Technical Services Librarians

The New York Technical Services Librarians, established in 1923, is one of the oldest regional groups associated with ALA/ALCTS. Our organization brings together librarians and information professionals to discuss ideas and practices, and to contribute their energy and knowledge toward the field of technical services librarianship.

Our Fall and Spring programs feature speakers addressing current issues of interest to librarians in technical services and systems. NYTSL's annual spring reception is another opportunity for professionals and library school students to come together. NYTSL programs are supported by event fees and generous corporate memberships.

Find out more about NYTSL, join, or renew your membership at www.nytsl.org.
